Please acknowledge that the platform is not a fully developed product, it has not been fully tested and must be used with care as any development prototype. Please also consider that, as any development prototype, it is subject to changes and modifications.

Open Motors (OSVehicle Limited Hong Kong, and OSVehicle Inc. USA) can not be held liable for any accident or event caused by the utilization and/or installation of non-certified and/or non-homologated equipment on public and/or private roads. Any misuse of the equipment, including mis-wiring of the Battery Management System, or other wiring systems, neglecting to voltage test Battery Management System wiring, or other wiring systems, opening or breaking the seals on the electronics enclosures, may cause permanent damage to the electronics and will entirely void any or all warranties whatsoever on the electronics.

As this is a development package it must be understood that the user, purchaser, and or client, must take **FULL RESPONSIBILITY** for any abuse to the equipment such as crash testing, prototyping iterations on the platform, changing the equipment beyond its original intention and may cause changes that can not be covered under any kind of warranty.

The **validity** of this price is 15 days from today.

Please understand that we must limit the validity of our offers since we are subject to important variations in currency exchange rates and suppliers' availability.

Availability: we should be able to deliver it to you in 10 weeks. Some delays may occur due to the banking holidays, summer/Easter holidays, COVID-19/Corona Virus, and due to component stock (up to 6-8 weeks).

Payment terms: the payment by T/T in EURO currency, and must be finalized in advance to confirm the order and secure our suppliers and all components listed above.
